Požadavky na studenty Podmínky zápočtu

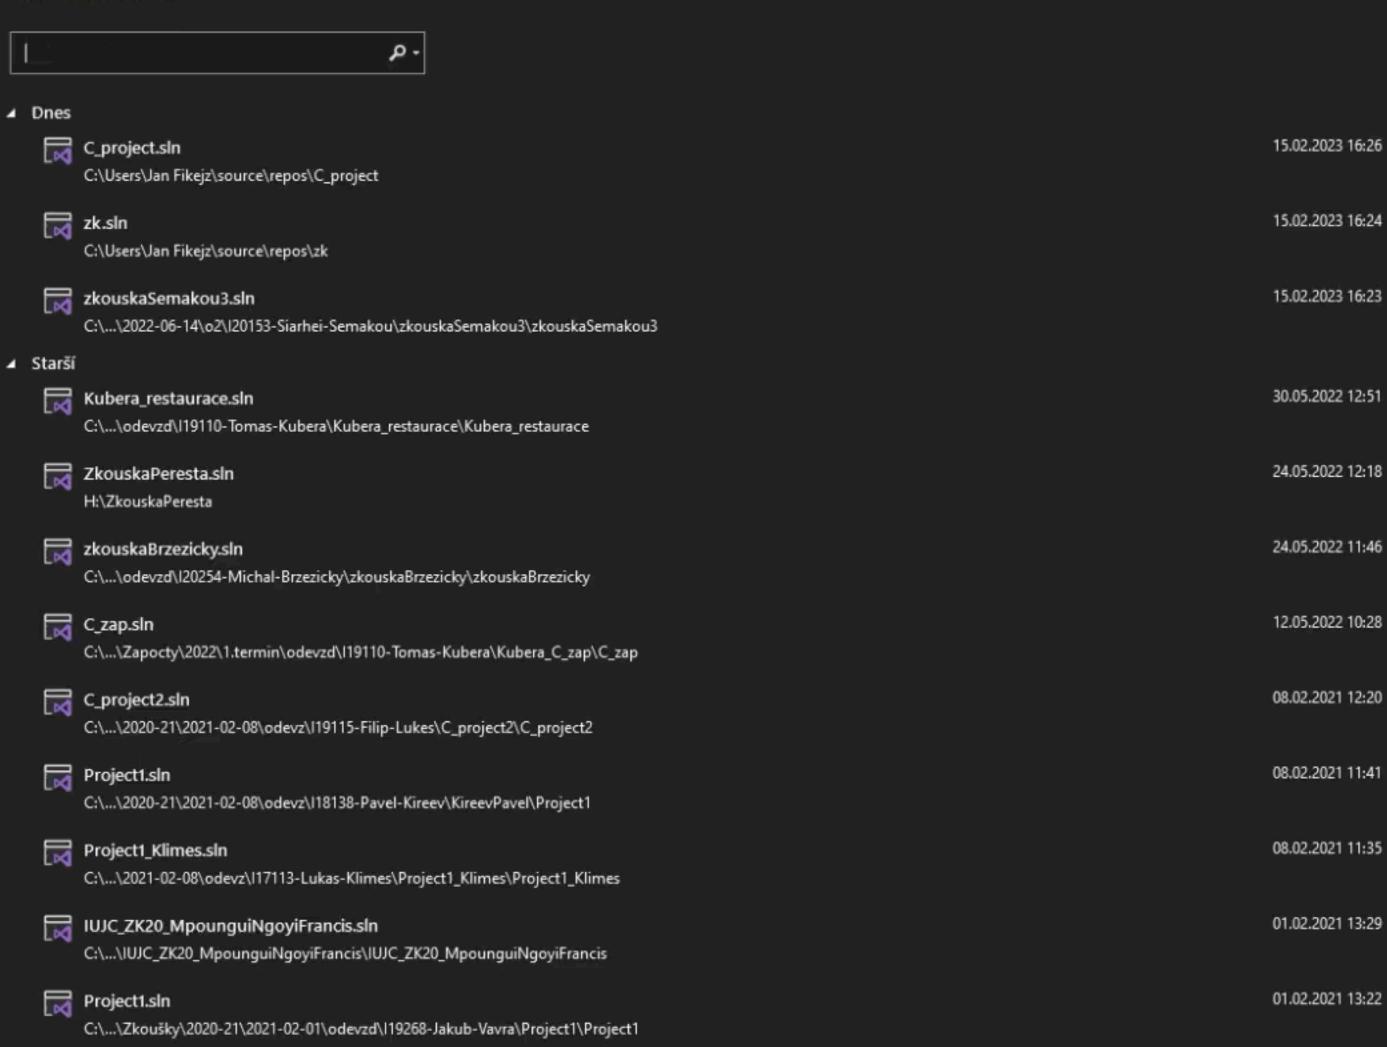

Zápočtový test (v zápočtovém týdnu)

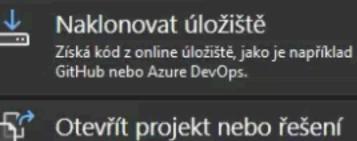

Nastavení MS Visual Studio

Co chcete provést?

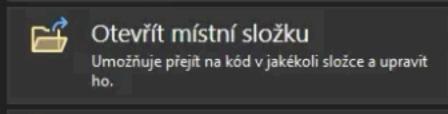

Otevřít nedávné

Začínáme

Vytvořit nový projekt Začněte zvolením šablony projektu s generováním kódu.

Komentáře ...to se hodí

```
/* this attempt to nest two comments /* results in just one comment,
    ending here: */ and the remaining text is a syntax error. */
```

Hello World První program v C

```
# main.c x

#include <stdio.h>

int main(void) {

printf("Hello World!\n");

return 0;
```

Input/Output printf & scanf

Formátovaný výstup printf()

```
→ int printf(const char *format, arg1, arg2, ...);
```

```
printf("%d green %s hanging on the wall.\n", 10, "bottles");
```

Formátovaný vstup scanf()

```
→ int scanf(const char *format, ...);
```

```
double fval;
scanf("%lf", fval); /* Wrong */
scanf("%lf", &fval); /* Correct, store input in fval. */
```

Čtení data dd/mm/yy

```
int day, month, year;
scanf("%d/%d/%d", &day, &month, &year);
```

Čtení bílých znaků

"one two"

```
char s[10], c;
scanf("%s%c", s, &c); /* s = "one", c = ' ' */
scanf("%s %c", s, &c); /* s = "one", c = 't' */
```

scanf() běžné případy

```
short a;
double b;
char c[20];
scanf("%hd %lf %s", &a, &b, c);
```
